Lather, rinse repeat. Seems wholly compatible with AF's" iterative process".

How about think, plan, measure twice, cut once?

If remediation activity stopped and Plume spreading then yes . Site goes back to KOUI Board.

KOUI is AZ's adoption of current EPA directive (Pruitt). Target a few key, backlogged, stalled sites. Resolve issues stalling the sites. Then target another set of sites. Resolve the issues stalling the second set of sites. Target another set of sites, etc. etc. Repeat process until no stalled sites.

Thanks Wayne, particularly from the transport model estimates from Praxis. Just curious, if the plume were to spread would the site again be placed on the KOUI board, or not?

Subject: 2018-11-1 - wafb - FYI - conditional concurrence - ST012 sulfate solution enhancement approved EPA-USAF-ADEQ

FYI - My purpose for concurrence documentation is to support an internal ADEQ request that the former Williams AFB site ST012 be removed from ADEQ's "KOUI Board" [Known, On-going, Unauthorized Impact]. This site was "boarded" due to the informal dispute and data gap discussions which "held" remediation continuance. Thanks.

Thank you. This email chain indicates that primary parties, EPA, USAF and ADEQ conditionally concur with Site ST012 remedy continuance. Unless superseded by a prior written agreement or record, Nov. 1, 2018 is the date ADEQ will use for administrative purposes.

EPA concurs, provided that agreement upon the location of wells requested in our July 3, 2018 letter meets with EPAs satisfaction, and are installed and operational by April 1, 2019. Looking forward to well placement discussions tomorrow.

The Air Force concurs and approves implementing ST012 sulfate solution enhancement as soon as possible.

Can you please provide confirmation that EPA and USAF concur to move ST012 sulfate solution enhancement forward? Does an email or written memo exist? ADEQ leadership requests project progress milestone documenting.

Thanks.
